## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 31-35, drawn to method for inactivating TSE, classified in class 424, subclass 94.1.
- II. Claims 12-27, drawn to a method of sterilizing apparatus, classified in class 422, subclass 1.
- III. Claim 28, drawn to an apparatus, classified in class 435, subclass 283.1.
- IV. Claim 29, drawn to a method of examining a sample, classified in class435, subclass 4.
- V. Claim 30, drawn to antibody, classified in class 436, subclass 512.

  The inventions are distinct, each from the other because of the following reasons:

Groups I, II, and IV are related as methods each of which have two-way distinctness because the sterilizing apparatus does not require inactivating TSE, per se and likewise method of Group I does not require method of sterlizing apparatus of Group II. Groups I and IV likewise require different steps for carrying out the respective processes as does Groups II and IV. Groups III and V are related in that Group III does not require the antibody of which is different and distinct from each of the Groups discussed above, because none of them require antibody. Hence there is two way distinctness between each of the method groups and one way distinctness between the apparatus and product antibody and method groups. Each are classified separately in a

Application/Control Number: 10/614,370

Art Unit: 1651

different classification and there would be a serious burden of search on the examiner to examine all of these claimed inventions.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1651

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah K. Ware whose telephone number is 571-272-0924. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
